

**STATE as 09.03.2011, This strategic action plan is based on the MAP and is regarded as an internal coordination instrument in progress**

**a\_demographic shifts**

**Action line: development and exchange of innovative measures coping with demographic shifts in the alpine space**

**Action a\_1.1:** organizes workshops or thematic seminars in order to exchange knowledge and experiences between different regional and national stakeholders involved in the field of sciences, politics and administration for a better management of demographic change in the Alps.

*Responsible Institution: WG Demography and Employment*

Next three expected milestones		
1	2	3
Results? Please report...		

**Action a\_1.2:** conducts a final report aiming at analyzing regional development factors related to the valorization of the endogenous socio-economic growth factors until the 12<sup>th</sup> Alpine Conference.

*Responsible Institution: WG Demography and Employment*

Next three expected milestones		
1	2	3
Results? Please report...		

**b climate Change**

**Action line: Adaption to climate change on natural hazard**

**Action b\_1.1:** promotes an integrated approach to adapt the Alpine space to new climatic conditions and better control natural hazards and limit their consequences

*Responsible Institution: Platform on Natural hazards*

Next three expected milestones		
1	2	3
<p><i>Documenting the effects of climate change on natural hazards in the Alps according to information of the individual PLANALP member countries.</i></p>	<p><i>Working steps in the "Natural hazards prevention" strategy:</i></p> <ol style="list-style-type: none"> <li><i>1. Identification of the most important impacts of climate change on natural hazards</i></li> <li><i>2. Discussion of uncertainties</i></li> <li><i>3. Definition of strategic objectives for main fields of action (Hotspots)</i></li> <li><i>4. Outline options for action</i></li> <li><i>5. Harmonisation of interfaces with other sectors</i></li> </ol>	<p><i>Report to Alpine Convention</i></p>

**Action line: Integrated natural hazard risk management**

**Action b\_1.2:** Identifies best practices in management of natural hazard and it will compile concepts for an integrated natural hazard management.

*Responsible Institution: Platform on Natural hazards*

Next three expected milestones		
1	2	3
<p><i>The aim of PLANALP is to support the management of risks caused by natural hazards in an inte-grated manner and to avoid increasing vulnerability.</i></p>	<p><i>The members of PLANALP have defined four priority action areas for prevention work against natural hazards (= Climate change and natural hazards, Risk dialogue, Residual risk, Land use)</i> <i>This areas are the main focus for future work</i></p>	<p><i>Recommendations</i></p>

**Action line: to exchange knowledge and experience concerning water-related issues**

**Action b\_1.3:** organizes two international, cross-sectorial workshops tackling the topics of sediment transport and hydro-peaking, with the goal to exchange knowledge and experiences with respect to aspects such as legal framework, challenges, approaches and solutions, cases studies, scientific experiences and ongoing research.

*Responsible Institution: Platform Water management*

Next three expected milestones		
1	2	3

**Action b\_1.4:** Germany hosts the 4<sup>th</sup> International Conference on Water in the Alps.

*Responsible Institution: Germany in cooperation with the Platform Water management*

Next three expected milestones		
1	2	3
<i>Results?</i> <i>Please report...</i>		

**c tourism**

**Action line: To diversify tourism offers with special focus on innovative measures in sustainable summer tourism**

**Action c\_1.1:** Develops and promotes innovative and sustainable offers in summer tourism.

*Responsible Institution: possible new WG Tourism and diversity*

Next three expected milestones		
1	2	3
Results? Please report...		

**Action c\_1.2:**

*Responsible Institution: WG UNESCO*

Next three expected milestones		
1	2	3
Results? Please report...		

**d\_biodiversity**

**Action line: To connect high valuable natural habitats in the alpine space**

**Action d\_1.1:** analyses the links/gaps between national/regional ecological networks in order to enhance cross border and interregional cooperation.

*Responsible Institution: Platform "Ecological network"*

Next three expected milestones		
1	2	3
Results? Please report...		

**Action d\_1.2:** supports the work on and practical appliance of selected questions chosen among the ones identified as alpine priorities by the research project.

*Responsible Institution: Platform "Ecological network"*

Next three expected milestones		
1	2	3
Results? Please report...		

**Action d\_1.3:** contributes to further improve and update the catalogue of measures, for example as a good practice tool for the "Green Infrastructure Initiative" of the European Commission and as a tool to monitor the alpine ecological network.

**Responsible Institution:** Platform "Ecological network"

Next three expected milestones		
1	2	3
Results? Please report...		

**Action d\_1.4:** defines the role of protected areas in times of climate change in the cooperation between protected areas in the Alps and the Carpates..

**Responsible Institution:** Task Force Protected Areas

Next three expected milestones		
1	2	3
Results? Please report...		

**Action line: information and awareness raising among stakeholders and the public**

**Action d\_1.5:** develops and implements the ALPARC communication strategy.

*Responsible Institution: Task Force Protected Areas*

Next three expected milestones		
1	2	3
Results? Please report...		

**Action d\_1.6:** maintains and develops existing cooperation tools and CNPA communication tools.

*Responsible Institution: Task Force Protected Areas*

Next three expected milestones		
1	2	3
Results? Please report...		

**Action d\_1.7:** organizes workshop on management indicators and environmental services, on common communication and education to the environment and on added value of protected areas to their regions.

**Responsible Institution:** Task Force Protected Areas

Next three expected milestones		
1	2	3
Results? Please report...		

**Action d\_1.8:** informs and raises awareness about wolf re-colonization of the Alps (pool of information, information tools).

**Responsible Institution:** Platform large Carnivores and wild ungulates

Next three expected milestones		
1	2	3
Results? Please report...		

**Action line: to enhance knowledge of biodiversity in the Alps**

**Action d\_1.9:** develops an alpine wide monitoring system for large carnivores (genetics, damages, etc.).

*Responsible Institution: Platform large Carnivores and wild ungulates*

Next three expected milestones		
1	2	3
Results? Please report...		

**Action d\_1.10:** elaborates a report on the state of Ibex in the Alps.

*Responsible Institution: Platform large Carnivores and wild ungulates*

Next three expected milestones		
1	2	3
Results? Please report...		

**e Transport and mobility**

**Action line: to analyse urban and interurban mobility in the alpine Space**

**Action e\_1.1:** analyses trends and priority policy strategies pertaining to traffic and all modes of urban and interurban mobility between alpine agglomerations, taking into consideration the links with peripheral areas.

*Responsible Institution: WG Transport*

Next three expected milestones		
1	2	3
Results? Please report...		

**Action e\_1.2:** identifies and assesses measures taken within the framework of comprehensive systems of urban and interurban mobility: in-depth analysis of functions and measures for management of urban and interurban mobility between cities in the relevant alpine spaces, in relationship with their peripheral areas.

*Responsible Institution: WG Transport*

Next three expected milestones		
1	2	3
Results? Please report...
